

InvigoFlex[®] GS is the newest joint supplement product especially formulated to provide you with a patented, -premium-quality, USP-grade, shellfish free and vegetarian safe Glucosamine Sulfate. Along with Boswellia Serrata, our proprietary blend in InvigoFlex[®] GS (GFL160™) offers you a unique formulation to support joint function and cartilage, giving you the necessary support when you need it most. Get back to what you love doing and keep your life active!

1. How does InvigoFlex[®] GS work?

As the aging process breaks down the cartilage in your joints, keeping up with an active lifestyle becomes increasingly difficult. Sports and exercise that once came easy might suddenly become too much for your aching joints. Repeated stress on your joints, whether it be from physical activities or from normal progression as we get older, can have negative effects on your cartilage. InvigoFlex[®] GS works by supporting joint function and cartilage and promoting overall good health of body joints, especially in the knees.

2. Why haven't I heard of InvigoFlex[®] GS?

While you may not have heard about the name InvigoFlex[®] GS, you may have heard about Glucosamine Sulfate. Since many products contain different versions and quality levels, we set out to create a brand that customers and doctors can trust to offer the right ingredients at the recommended amounts. We took the best of Glucosamine Sulfate, and now made it shellfish free and vegetarian safe. In addition, -Invigo Flex[®] GS contains Boswellia Serrata and is Gluten free, GMO free, and contains little to no sodium content.

3. Who should take InvigoFlex[®] GS?

InvigoFlex[®] GS should be taken by anyone who is looking to promote and maintain overall joint health. This can apply to the most active customers who are engaged in weekly physical activities, to individuals who are worried about their natural joint progression. InvigoFlex[®] GS not only helps customers who are currently feeling joint discomfort, but

also those who would like to maintain their joint health. InvigoFlex[®] GS can satisfy both customers' short-term and long-term needs for the overall well-being of their joints.

4. Is InvigoFlex[®] GS proven to work?

Glucosamine Sulfate has been studied for its ability to modify underlying cartilaginous degeneration in joints, and therefore, to potentially provide relief to customers. The majority of studies have demonstrated the ability of Glucosamine Sulfate to alleviate symptoms of joint -discomfort due to overexertion and exercise.

5. Does InvigoFlex[®] GS work right away?

It is highly recommended that InvigoFlex[®] GS be taken for a minimum of three months. While some customers may feel results as soon as 1-2 weeks, optimal effect can be seen after 12 weeks of daily administration. Results may vary depending on the customer's individual medical history.

6. How safe is InvigoFlex[®] GS?

InvigoFlex[®] GS is safe with very minimal to no side effects reported. However, we recommend consulting with your physician so that they can better advise you on how InvigoFlex[®] GS fits in with your individual medical history. If you are pregnant or breastfeeding, ask your Doctor before taking.

7. What makes InvigoFlex[®] GS different than other joint supplements?

InvigoFlex[®] GS main difference is that it offers customers high quality Glucosamine Sulfate that is Shellfish free, vegetarian safe, and contains low sodium content. In addition, our Glucosamine Sulfate is a premium-quality and USP-grade ingredient. Its overall patented ISCTM method ensures quality assurance and ingredient purity and -protection. In addition, we include extracts of Boswellia Serrata which is a new and exciting ingredient for the joint health category.

8. What is the benefit of Boswellia Serrata?

InvigoFlex[®] GS contains a relatively new ingredient to the joint market called Boswellia Serrata. Also known as Indian Fraincense, Boswellia Serrata is a plant and natural extract that has been shown to have many different health applications, including supporting joint health. Its natural properties have also been known to have antioxidant benefits and may even help with reducing pain from overexertion and exercise. The benefits of Boswellia Serrata have been validated and confirmed in multiple studies.

9. Is InvigoFlex[®] GS Gluten and GMO Free?

Yes, InvigoFlex[®] GS is Gluten Free and GMO Free.

10. I worry about Sodium levels in products. What is the Sodium content in InvigoFlex[®] GS?

Many customers today worry not only about sodium intake within foods, but also within their dietary supplements. Other glucosamine products can have upwards of 50 mg to 150 mg per serving and in some cases, even more. One of the main advantages with InvigoFlex[®] GS is that it has little to no sodium to declare.

11. What is the recommended dosage?

The recommended dosage for InvigoFlex GS is 1,600 mg split between two pills. Take two pills together with water, preferably with food, in the morning every day.
