

## Natural Vitamin E for Superior Antioxidant Protection

Harness the natural power of Nutressa® Vitamin E with our sunflower-based formula, providing 400 IU of this essential fat-soluble antioxidant. Vitamin E plays a critical role in protecting your cells from oxidative damage by neutralizing free radicals, which can result from everyday activities and environmental exposures.

Unlike many Vitamin E supplements derived from soy, a common allergen, our formula uses sunflower oil as its source. This natural alternative offers a clean, effective, and allergen-friendly way to support your overall wellness. Research shows that natural Vitamin E is significantly more effective than synthetic forms, making our Sunflower E 400 IU a superior choice for antioxidant support.

### Features

- **Powerful Antioxidant Protection:** Helps protect cells from oxidative damage caused by free radicals.\*
- **Supports Overall Wellness:** Promotes healthy skin and immune function as part of a balanced lifestyle.\*
- **Natural Source:** Derived from sunflower oil, not soy, for an allergen-friendly option.
