

Blood Sugar Management for a Healthy Heart

PreDia® presents a complete line of specialized products designed to support individuals managing high blood sugar and those focused on maintaining a healthy heart. This thoughtfully developed range offers trusted, effective solutions that help promote balanced blood sugar levels and cardiovascular well-being.

With PreDia®, you can meet the growing demand from health-conscious customers seeking reliable support for these important wellness areas—helping you expand your selection with products that deliver real value and results. Experience the benefits of partnering with a brand committed to quality and effectiveness in blood sugar and heart health management.

Ultimate Blood Sugar Support

With chromium and cinnamon, this formula supports stable blood sugar, heart health, weight management, and efficient metabolism.*

Healthy Cholesterol Support

This formula combines nine aliphatic alcohols, led by octacosanol from sugar cane, to support healthy cholesterol levels and promote cardiovascular health.*

Healthy Metabolism & Cardiovascular Support

This supplement includes ChromeMate®, a bioavailable chromium complex, to support carbohydrate, fat, and protein metabolism and fill dietary chromium gaps.*

Healthy Blood Pressure Support

This formula blends magnesium, arginine, olive leaf extract, garlic, and grapeseed extract to support normal blood pressure and healthy blood vessel function.*

Healthy Cellular Energy Production Support

CoQ10 supports heart health and energy. Our oil-infused soft gels improve absorption, with natural separation that doesn't affect potency.*
