

Activine™

Empower Your Inner Strength. Boost Physical and Mental Energy!

As we get older, our body's ability to maintain essential protein synthesis for a healthy mind and body diminishes. Strong internal muscles play a vital role in supporting proper organ function, including the heart and bowel movements. Meanwhile, our skeletal muscles are crucial for maintaining a youthful posture, enabling fluid body movements, and preserving a vibrant appearance.

Activine™ works by optimizing and enhancing your body's natural protein synthesis process. By providing essential nutrients, it supports the maintenance of healthy internal muscles that are fundamental for various organ functions such as the heart and digestive system. Additionally, Activine™ nourishes skeletal muscles, promoting their strength and flexibility, which aids in sustaining a youthful posture, improving movement capabilities, and preserving a vibrant appearance. Its targeted formula ensures a holistic approach to supporting your body's vitality and overall wellness.

Features

- Colostrum (30% IgG): supports immune function and stimulates IGF-1 and GH production.*
- Alpha-GPC: stimulates pituitary gland for increased secretion of growth hormone and supports brain health.*
