

Orthomolecular Endothione™

Comprehensive Wellness Support Through Glutathione Precursor Nutrition.

Endothione™ is a premium dietary supplement that provides key precursor nutrients needed to support the body's natural glutathione production process. Glutathione is a vital antioxidant found in every cell, playing a central role in maintaining oxidative balance and supporting detoxification, immune health, and muscle function.

Because oral glutathione is poorly absorbed, Endothione™ is uniquely formulated to encourage the body's own production of bio-compatible glutathione. By combining essential amino acids with a targeted probiotic and key cofactors like zinc and selenium, Endothione™ promotes an internal environment that supports glutathione synthesis within the gut and liver—where it matters most.

Our delayed-release vegetarian capsule is designed to optimize ingredient stability and absorption, minimizing degradation from stomach acids for maximum benefit.

Features

- Provides building blocks for endogenous glutathione production.*
- Contains a unique probiotic strain (*Lactobacillus fermentum*) plus essential cofactors.*
- Includes selenium and zinc to support antioxidant and immune functions.*
- Delayed-release capsule to enhance ingredient delivery and absorption.*
- 100% vegetarian formula with no artificial colors, flavors, or preservatives.*

Benefits

- Supports natural glutathione levels in the body.*
- Helps maintain antioxidant defenses against oxidative stress.*
- Promotes healthy liver function and detoxification pathways.*
- Supports muscle recovery and immune system health.*
